“ *I helped Willie when he was at Mariner Health care years ago. I used to sit in there and talk with him with the communication board. I think of him often. RIP my friend.*

“Willie touched so many lives, especially after he suffered a brain stem stroke in January 1988. For many years Willie begged to die. I could completely understand. Overnight he became totally depend for his existence, from feeding to turning, to changing. The only thing Willie could do was moving his eyes. His mind was fine. He learner to communicate with a plexiglass board with letters. It was slow but he could tell you what was on his mind. The staff at Seneca Health and Rehabilitate soon learned to love him and to communicate with him. The staff did everything they could to make his life better. Willie had so many friends before he got sick. A few came to see him in the nursing home but stopped very soon telling me they couldn't stand to see him in that condition. It didn't take much to make Willie happy. An unexpected visit from an old friend made him so happy. The only noise he could make was to laugh, and boy could he laugh. You could hear him up those long hallways. He loved NASCAR, country music and pretty girls. He got scolded more than once over the pretty girls!! Willie realized after many years that the Lord had a different plan for his life. He was not going to die before God was ready for him. I have prayed the reason was to make people appreciate their health and not to take life for granted. Thank you SHAR for being so good to Willie for all these years. Thank you Hospice House staff for helping Willie, Michael, Tabitha and myself through this terrible time. Everyone was so good to all of us. The last thing Willie communicated to me with the board was "Thank you and I love you." I should have been the one saying thank you for almost 30 years. He was my BUDDY and I will always love him. I miss him so already!! Linda
